

ENTRANCE PANELS

Single Button Units 9200/1

- Video compatible
- Flush metal capped button
- Choice of finishes
- Tamper resistant fixings
- 5900 range compatible

The Entryphone® 9200/1 single button panel presents a very compact unit for where only a single ringing line is needed; available in brushed stainless steel, mirror polish stainless steel and polished brass (unlacquered). All units contain a weather-resistant speech module, a flush metal button and tamper-resistant hex-key fixings.

Units can be ordered either as audio or video versions.

These units are supplied either with a surface frame (standard) or with a back box for flush fitting. For the stainless steel finish, the surface frames are made in the same material as the panel but for polished brass units the frames are made in solid oak.

200/500 Series Compatible

All entrance panels can be supplied with either 200 or 500 series telephone speech components.
