

Vertical Solutions Brochure

Logistics

Panasonic Logistics Solutions provide a range of products for the small, medium and large business, delivering advanced solutions that enable efficient communications anywhere on site, from the office to the warehouse stores.

User friendly, reliable systems help to optimise business efficiency and improve productivity, even in demanding environments.

The foundation of these solutions starts with Panasonic Unified Communication Solutions.

EVERY
CALL
MATTERS

SOLUTIONS FOR LOGISTICS

- A Proven long-established provider of solutions, in over 40 countries worldwide.
- Panasonic communications solutions have tailored applications, designed that enable you to implement advanced business solutions
- Panasonic communications platforms have been designed with applications like voicemail, auto attendant and unified messaging to be a standard part of the Panasonic systems.
- Take advantage of a wise investment with Panasonic Unified Communications Solutions for Logistics, in business for over 23 years.

Panasonic an important Solution Provider in the Market

Panasonic Unified Communication solutions come with an exciting array of business intelligent features and applications specifically designed to improve communications in logistics and warehousing industries.

Panasonic provides solutions for:

- Small, medium and large logistic and distribution warehouse facilities.
- Mobile and remote workers.
- Multi-site organisations.

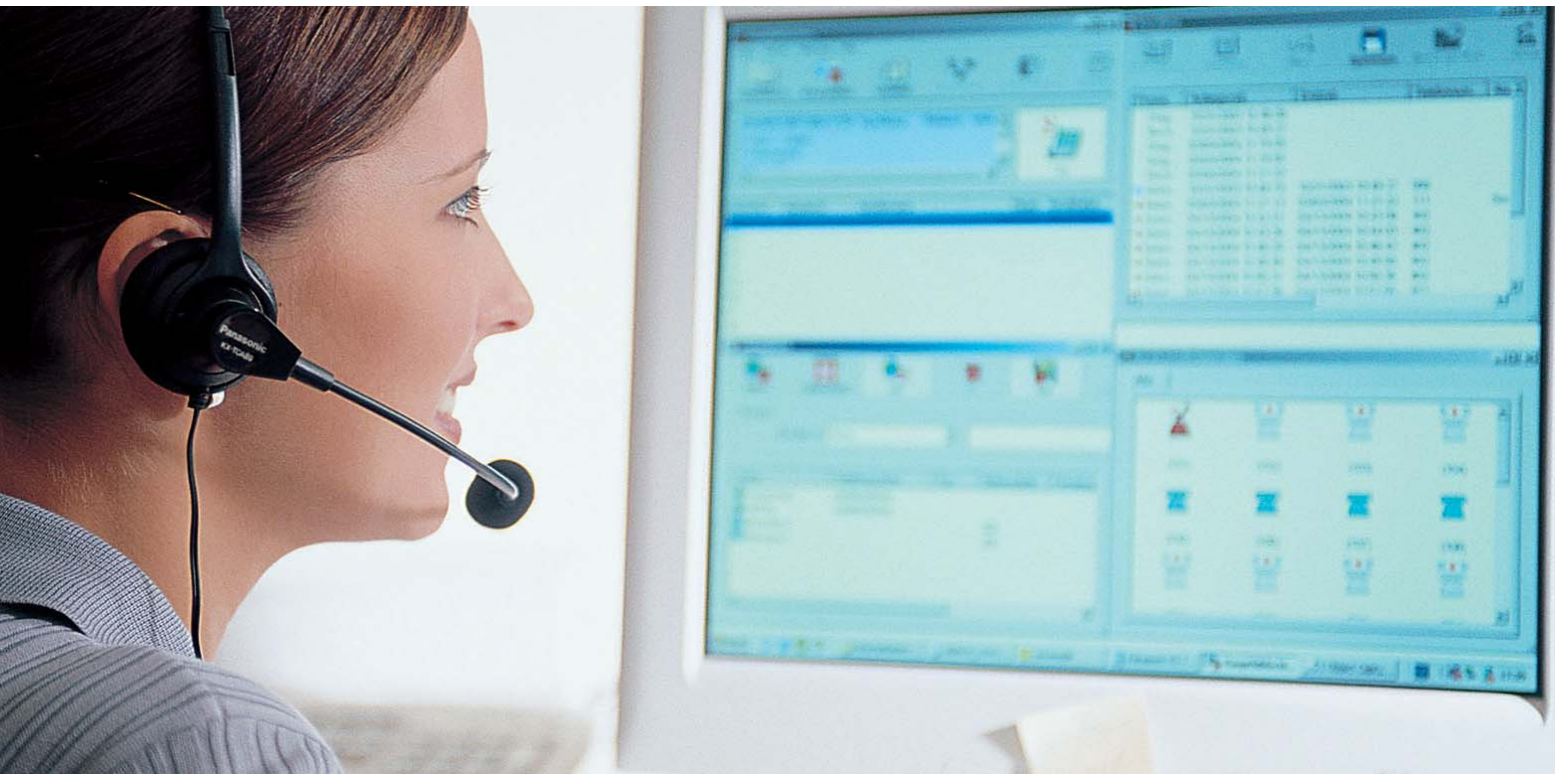

With the Panasonic Logistics Solution - employees can remain in touch from anywhere on site, thanks to multi-cell cordless DECT systems, along with sophisticated voice mail systems to make sure messages get through, even at busy times.

Advanced solutions allow remote camera integration to help manage large sites, and door control systems to simplify life for receptionists and security staff. Compatibility with a broad range of 'phones, including ruggedized cordless DECT units, means an excellent range of choices where cabling is a challenge.

Never miss a call

Built-in auto attendant makes sure that busy shop floor employees can provide an alternative contact point when they are unavailable. Auto attendant provides users with an easy to use menu to guide them directly to the required department, helping to direct calls to the most appropriate site location.

Save money and reduce costs

Looking to replace an existing solution?

Panasonic systems work with a wide range of IP and digital handset devices, and support migration for 4 generations of handsets, including basic industry standard analogue.

Panasonic solutions are very efficient in power consumption, some consuming over 54% less than previous generations of products.

Stay in Touch

DECT wireless mobility can play an important role in a warehouse environment ensuring that key members of staff never miss calls. Mobile staff can be provided with a range of handsets to stay in contact with the office and colleagues alike.

Have staff moving between different locations?

No problem. Special features make sure that all calls can be answered either from a desk, DECT wireless, or in fact, 3G mobile handset. All with the same number.
